Department of Geography, Lecture room Z4,

Building n. 5, Kotlářská 2, Brno, 61137

Abstract

Alexander's research interests are eclectic. Topics include, but are not limited to, XR, embodiment, virtual field trips, spatial cognition, wayfinding, geographic event conceptualization, formal characterizations of dynamic spatial processes, location-based services, landscapes and land cover concepts, crowd-science and crowd-sourcing, and featured prominently in recent projects, Virtual Reality, and 3D modeling.
